

# 2. **D4**

## DOUBLE-DIODE

### OPERATING DATA.

Heater Voltage .. .. .	4.0 V.
Heater Current .. .. .	0.65 A.
Max. Diode Voltage .. .. .	200 V.
Max. Diode Current .. .. .	0.8 mA.

### APPLICATION.

The 2.D4 consists of two diode anodes surrounding a common cathode. The diode connected to the top cap is intended for use as speech detector,

and the second diode may be employed for applying automatic volume control or for noise suppression. Suitable circuit arrangements are shown in the article on pages 89 and 90.

### BASE.

Standard 5-pin, with top cap. For connections see page 91.

### BULB FINISH.

The 2.D4 is supplied with metallised bulb only.

**PRICE 5/6**
