

# The Valve Museum

---

## Updates November 2019

The main activity this month has been building two Chinese audio amplifier kits. The small FU-32 (832A) single ended amplifier is described in art-261 and the larger EL34-B single ended stereo amplifier is described in art-262.

Also a write-up on a 6P3P (6L6) amplifier with a switch mode power supply.

Added 9 new exhibits taking the count from 5955 to 5964
