

The Valve Museum

Updates January 2020

John Howes has lent the museum a set of Mullard data-sheets in binders. Checking through volume one has located much greater details for ECF80, EF91 and M8136. These have been scanned and added. From Frank Philipse site a further eleven types with more extensive details have been substituted. 6021, E810F, EB91, ECC2000, EF95, EF184, ME1402, PCL82, PCL84, PY500 and UCL82. E80CF now has an attached data-sheet.

From volume 2 we have added revised versions of DAF96, EC70 and ECC91 data-sheets.

Added a PDF version of the M-OV Transmitting Valves booklet from 1970/71 ref-4115.

Attila Balaton has drawn the circuit of the Dynamic Mutual Conductance tester art-237 and this has enhanced the article.

Scans of data-sheets from Mark Mallison have been made into multi-page PDFs and added to exhibits or equivalent pages.

Trawled through the CV sheets scanned by Frank Philipse from CV1 to CV2000 and added a further eight new data-sheets.

Initial trawl from CV2000 and added 150 data-sheets

Added 0 new exhibits taking the count from 6016 to 6016

--	--	--	--	--	--

Added 200 PDFs without exhibits to equivalents
