## Updates July 2021

Any file reference given here can be located by using the search facility. E.g., A search for art-322 will go directly to the article. The article will also appear in the articles index and linked to some exhibits and/or indexes.

Boxes and adverts can be found in the same way, by search or via the indexes.

Related links appear in the main heading box, under the title plus the extra's menu on the right side of each page is being expanded to give links to related material.

In April 2021 a quick and dirty software change allowed a few tear-down articles to be added to the index pages where multiple makers versions exist of a valve Type. This month the full software change was implemented. The article links are now stored in the equivalents database and appear in the headings and extras menu of the 'more boxes' where appropriate.
