

Super Power Type UD 2

Average Characteristics:

Filament voltage . . . V_f	= 2 Volts
Filament current . . . I_f	= 0.2: Amp.
Max. Plate voltage . . V_a max.	= 150 Volts
Slope S	= 1.8 mA/V
Amplification Factor . μ_a	= 5
Impedance R_i	= 2750 Ohms

An excellent valve for full, undistorted loudspeaker reproduction. A 13 Volts negative Grid bias are required for 100 to 150 Volts HT.
